# FACTSHEET

## IOC INTEGRITY BETTING INTELLIGENCE SYSTEM (IBIS)

UPDATE – DECEMBER 2017

### WHAT IBIS IS:

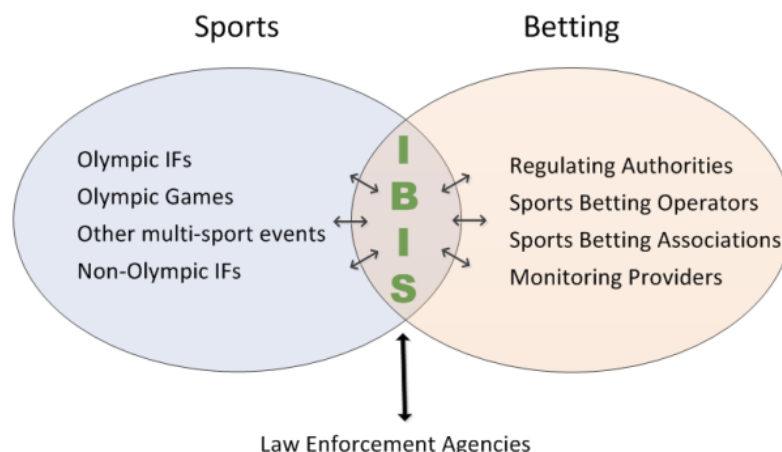

- Pragmatic approach = Built upon the experience of the Olympic Games London 2012
- Permanent system = Available for major events of International Federations (IFs)
- NOT a monitoring system = System for exchange of information/intelligence
- Compatible with the setup of the Convention of the Council of Europe on the Manipulation of Sports Competitions = as unique contact point for national platforms to IFs/IOC (strong cooperation with the 'Group of Copenhagen' = group of existing national platforms)
- Administered within the Olympic Movement Unit for the Prevention of the Manipulation of Competitions within the IOC
- Potential legacy for the organisers of the OG with regards to a) major sporting events and b) the implementation of the Convention of the Council of Europe
- Free of charge for all partners = IOC covers the costs of the platform
- Gives Sports betting industry direct access to IFs and vice versa

### WHAT IBIS DOES:

- Collects and distributes information and intelligence related to sports betting for use by all stakeholders of the Olympic Movement
- Enables communication between all partners on the sports side and the different sports betting entities

### WHAT THE AIMS OF IBIS ARE:

- To safeguard sports from any negative influence connected to sports betting
- To support IFs and organisers of multisport events in the fight for clean athletes and clean competitions, by providing them with alerts and intelligence via a centralised mechanism for the exchange of information
- To create a framework for transparency, confidentiality and trust between all stakeholders

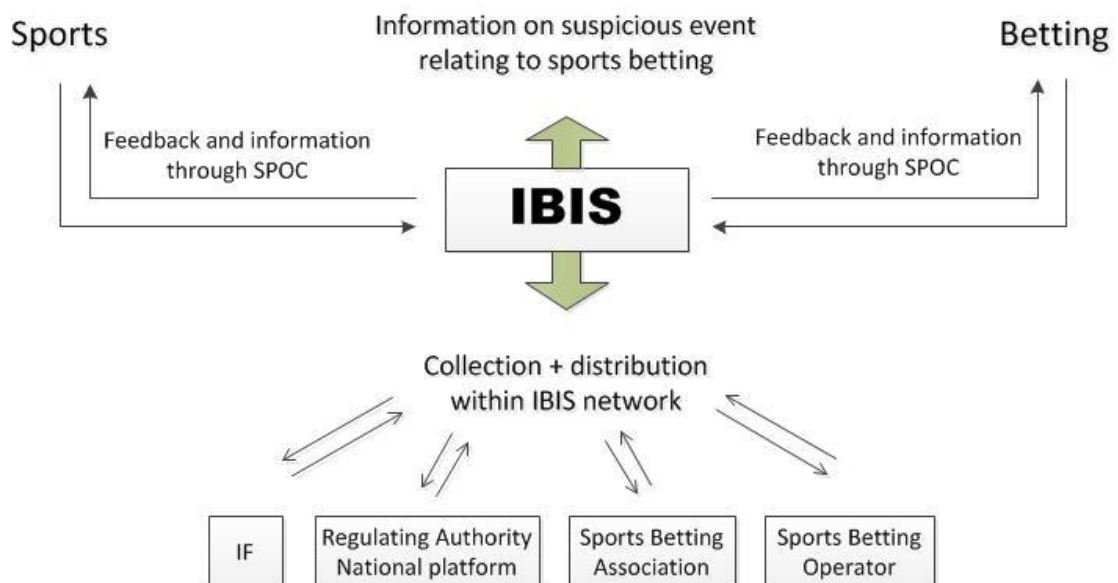

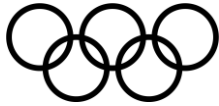

## RECIPROCAL RESPONSIBILITIES

- Regulators and operators undertake to pass on all alerts and relevant information on potential manipulation connected to sports betting on the events chosen run by each IF
- IOC undertakes to aggregate and analyse the information received before passing it on to the IFs concerned
- During the Olympic Games, the IOC is responsible for the application of rules and sanctions
- In between editions of the Olympic Games, IFs are responsible for deciding, pursuant to their own rules and regulations, how to deal with the information: investigation, analysis of the sporting aspect of the competition concerned and the application or non-application of measures and/or sanctions
- IFs undertake to convey the results of their analysis and any action taken to the IOC, who may then pass the information on to the relevant stakeholders at the origin of the alert
- In the event that an IF suspects one of its events has been jeopardised, the IF may ask IBIS for any information on the betting market

## THE MECHANISM

- IBIS became operational in January 2014
- Single points of contact (SPoC) have been established within each partner that signed an agreement
- Every SPoC has a dedicated log-in into the secured IBIS-platform

### ***Current Cooperation Partners***

The IOC has signed MoUs with all major stakeholders concerned by the challenge:

- **Sports Movement:** All IFs of Olympic sports; various IFs of non-Olympic sports; the network will be cautiously expanded to other multi-sports events.
- **Sports Betting Regulators:** All major regulating authorities are part of IBIS.
- **Sports Betting Operators:** A Large number of public operators/lotteries and private operators either directly or via associations.
