Event Overview:
Organised by the International Olympic Committee (IOC) and the Global Association of International Sports Federations (GAISF), **The Esports Forum** will bring together leading figures within the esports industry and the Olympic Movement to discuss opportunities for further engagement and interaction.

Following the October 2017 Olympic Summit Declaration, which called upon the Olympic Movement to explore engagement with the esports industry, there has been increased dialogue and collaboration between the world of esports and the Olympic Movement. Therefore, it is an ideal time to build and foster this critical touchpoint between the two movements, encouraging conversations in which diverse views and opinions can be shared.

The Esports Forum will take place on the evening of Friday 20 July and all day on Saturday 21 July in Lausanne, Switzerland at The Olympic Museum. On Friday 20 July, all Forum guests are invited to attend a networking dinner to kick off this historic event. The programme on Saturday 21 July will feature high-level panels, one-on-one interviews, interactive breakout discussions, and multiple networking opportunities.

Participants will include leading stakeholders in the esports industry, including game publishers, event organisers, integrity bodies, players, teams, broadcasters, media, independents, academics, and representatives of the Olympic Movement, including IOC Members, Olympians, commercial partners, rights holding broadcasters, representatives of International Sports Federations and National Olympic Committees.

Key Objectives:

- ✓ Build joint understanding between the esports industry and the Olympic Movement regarding the Olympic values & structures.
- ✓ Set a platform for joint engagement between the esports industry and the Olympic Movement clarifying the next mutually beneficial steps in the engagement.
